DETAILED ACTION

1. Claims 134-139, 142, and 153-186 are allowed. These claims have been renumbered as claims 1-41.
2. Claims 1-133, 140, 141, and 143-152 have been cancelled.

REASONS FOR ALLOWANCE

3. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including "analyze the first set of data to make a determination whether the first set of data indicates that it is from a first source coupled to the external network, but is actually from a second source coupled to the external network, wherein the determination is based, at least in part, on an age of the first set of data; upon the determination that the first set of data is actually from the second source, provide output from the information handling system indicative of the determination" as recited in independent claim 134.

As per claim 139, the prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including "the security program on the first computing device analyzing the origin's response to the sent data to make a determination whether the origin of the web page is the first source; and upon the determination that the origin of

Art Unit: 2167

the web page is not the first source, providing output from the first computing device that is indicative of the determination” and similarly recited in independent claim 160 and 161.

As per claim 153, the prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant’s invention nor anticipate the combination of claimed elements including “the security program determining that the layout of the received web page is similar to a layout of a known mistrusted web page; upon determining that the layout of the received web page is similar to the layout of the known mistrusted web page, the computing device providing output indicative of the likelihood that the received web page is misrepresented as being from the trusted source” and similarly recited in independent claim 158.

As per claim 155, the prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant’s invention nor anticipate the combination of claimed elements including “a security program on a computing device making a determination of the likelihood that a web page received via a computer network is misrepresented as being from a trusted source, wherein the determination is based on one or more of the following criteria: an age of the web page, a size of the web page, a number of hyperlinks to the web page from trusted sources” and similarly recited in independent claim 159.

A determination or determine is interpreted as a security administrator 402 determines whether an Internet address is stored in either a trusted web pages database 508 or a mistrusted web pages database 506. If so, then the determination

Art Unit: 2167

indicates that the Internet address represents either a trusted web page or a mistrusted (“spoof”) web page (see Specification, Publication Document No. **20040123157**, paragraphs [0085] and [0087]). Also, the security provider administrator provides a score in the determination, wherein the score indicates that the web page associated with the Internet address is inconclusively either a trusted web page or a mistrusted web page.

The remaining claims are dependent claims, thus these claims are patently distinct over the art of record for at least the above reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
